**Columbus Ohio**  
**303: Endo-Implantology Course.**  
**Incorporating Implants and Alveolar Socket Management**  
**Into Your Endodontic Practice.**  
**March 28th, September 11th 2009**

**Course Details**

This course is open to endodontists (and staff) with DDS, DMD or equivalent qualification.  
 The course consists of lectures and demonstrations, followed by hands on practice with models, and group question/ answer sessions.  
 The use of surgical and prosthetic components will be demonstrated. Also how to incorporate processes into your office to create a suitable team environment for predictable outcomes.

**Hands-on participation:**

- Incorporating dental implants into the endodontic practice, easily and predictably.**
- Surgical anatomy, basic implant cases, indications for implants for the endodontist.
- Tissue management and surgical principles with basic implant placement.
- Step-by-step immediate implant placement following tooth extraction.
- Hands-on procedures: placing implants in models, and prosthetic components (parts and pieces).
- Artificial mandibles- simple cases for the endodontists, Straight vs. Angled abutments.
- Impression posts.
- Healing abutments.
- Bone grafting materials to use with immediate placement following extraction.
- Using PRP to obtain more predictable healing results.
- Details of externship program- bring your own patients and perform the procedure under close supervision.

**Course fee:**  
**Doctors \$950,**  
**Accompanying**  
**assistants \$175**  
 (Breakfast snacks, luncheon included)

*Personal achievement assessment forms will be completed at the beginning and end of the session.*

**What you will learn:**

This program is designed to teach **SIMPLE** implant surgery and **SIMPLE** socket preservation through hands-on training. Midwest Implant Institute has been facilitating implant education for 29 years. Educating dentists and staff about implantology and providing the opportunity to replace and restore implants is a major step in providing patients with advanced technological break-throughs of contemporary dentistry **It is an introductory course to the comprehensive IMPLANT EXTERN TRAINING PROGRAM.**

**See website for full details:**
